

LED Intensity Control Pot

CP-1

3/8/93

The LED Intensity Control Pot may be used to control the intensity of the LED's on the US-8, SR-8, R-1, M-1, OPT-1 or FP-5. Also, it can be used to control the intensity of the plasma display on the UBG-16. This pot can be connected to any one or all of these units at the same time. It provides linear control of the Display LED intensity (or plasma display) for low ambient light or night operation.
